- **Energy rating** 15 Eggshill Lane Yate BRISTOL **BS374BH** Valid until Certificate number 2080-3857-6040-3007-3005 6 March 2034 **Property type** Semi-detached house
- **Total floor area** 55 square metres Rules on letting this property

You can read guidance for landlords on the regulations and exemptions.

Properties can be let if they have an energy rating from A to E.

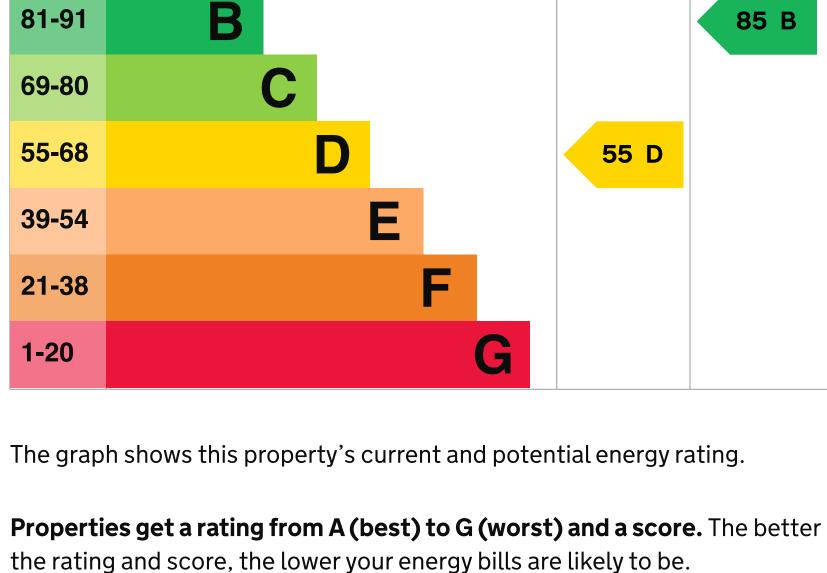

Energy rating and score

See how to improve this property's energy efficiency.

Energy rating Current Score

This property's energy rating is D. It has the potential to be B.

92+

For properties in England and Wales:

 the average energy rating is D • the average energy score is 60

Breakdown of property's energy

Features in this property

performance

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition. Assumed ratings are based on the property's age and type. They are used for

(assumed)

features the assessor could not inspect.

Description Rating Feature Wall Sandstone or limestone, as built, no insulation Very

Roof Pitched, no insulation (assumed) Very poor

Roof	Roof room(s), ceiling insulated	Very poor		
Window	Fully double glazed	Good		
Main heating	Boiler and radiators, mains gas	Good		
Main heating control	Programmer, room thermostat and TRVs	Good		
Hot water	From main system	Good		
Lighting	Low energy lighting in all fixed outlets	Very good		
Floor	Solid, no insulation (assumed)	N/A		
Secondary heating	Room heaters, wood logs	N/A		
Low and zero carbon energy sources				
these sources ma	bon energy sources release very little or no CO2. In any help reduce energy bills as well as cutting carbollowing low or zero carbon energy sources are ins	on		

Primary energy use The primary energy use for this property per year is 366 kilowatt hours per

square metre (kWh/m2). About primary energy use **Additional information**

Additional information about this property: Stone walls present, not insulated

• Biomass secondary heating

this property:

How this affects your energy bills An average household would need to spend £1,485 per year on heating, hot

improving this property's energy rating.

water and lighting in this property. These costs usually make up the majority of your energy bills. You could **save £607 per year** if you complete the suggested steps for

water and lighting. **Heating this property**

Estimated energy needed in this property is:

• 11,830 kWh per year for heating

• 1,671 kWh per year for hot water

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

Carbon emissions

An average household produces This property produces

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Typical yearly saving Potential rating after completing 64 D step 1

Step 3: Floor insulation (solid floor) Typical installation cost

Step 2: Internal or external wall insulation

Potential rating after completing steps 1 to 3	70 C
Step 4: Solar water heating	
Typical installation cost	£4,000 - £6,000
Typical yearly saving	£51
Potential rating after completing steps 1 to 4	72 C
Step 5: Solar photovoltaic panels, 2	2.5 kWp

You might be able to get a grant from the **Boiler Upgrade Scheme**. This will help you buy a more efficient, low carbon heating system for this property. More ways to save energy
