Valid until Certificate number 19 July 2031 0231-0200-1809-9056-0004 **Property type** Mid-terrace house **Total floor area** 79 square metres

Rules on letting this property Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions.

Energy rating and score

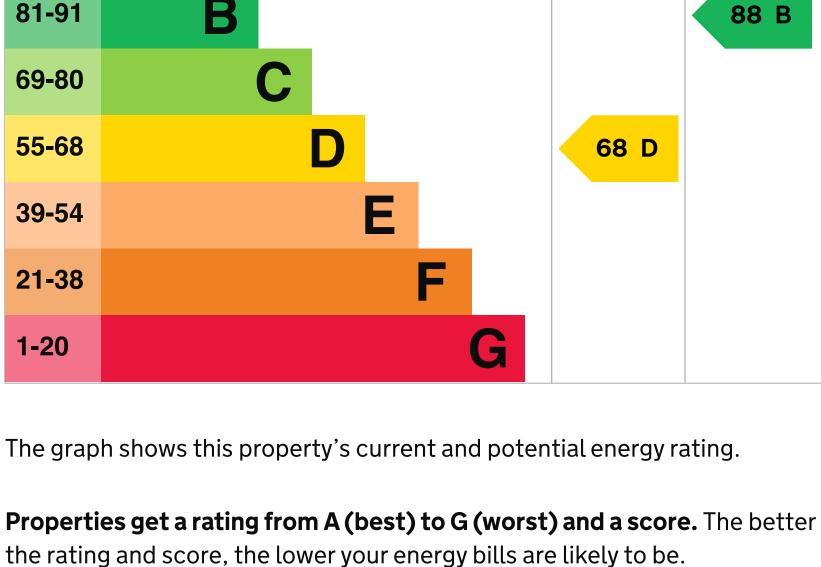

Current 92+

Score **Energy rating**

This property's energy rating is D. It has the potential to be B.

81-91

See how to improve this property's energy efficiency.

For properties in England and Wales:

• the average energy rating is D • the average energy score is 60

Breakdown of property's energy

performance

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition. Assumed ratings are based on the property's age and type. They are used for

features the assessor could not inspect.

Roof

Pitched, 100 mm loft insulation

Main heating Programmer, no room thermostat Very poor control From main system Hot water Good Low energy lighting in all fixed outlets Lighting Very good N/A Solid, no insulation (assumed) Floor Secondary heating N/A None Primary energy use The primary energy use for this property per year is 228 kilowatt hours per

• Cavity fill is recommended

square metre (kWh/m2).

About primary energy use

Additional information

Additional information about this property:

Dwelling may be exposed to wind-driven rain

An average household would need to spend £721 per year on heating, hot

You could save £216 per year if you complete the suggested steps for

How this affects your energy bills

water and lighting in this property. These costs usually make up the majority of your energy bills.

improving this property's energy rating.

Estimated energy needed in this property is:

Impact on the environment

• 9,583 kWh per year for heating

water and lighting.

Heating this property

This is **based on average costs in 2021** when this EPC was created. People

living at the property may use different amounts of energy for heating, hot

• 1,886 kWh per year for hot water

This property's environmental impact rating is D. It has the potential to be B.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

An average household produces

Carbon emissions

This property produces

This property's potential 1.0 tonnes of CO2 production

You could improve this property's CO2 emissions by making the suggested

6 tonnes of CO2

3.2 tonnes of CO2
