Energy rating

Rules on letting this property Properties can be let if they have an energy rating from A to E.

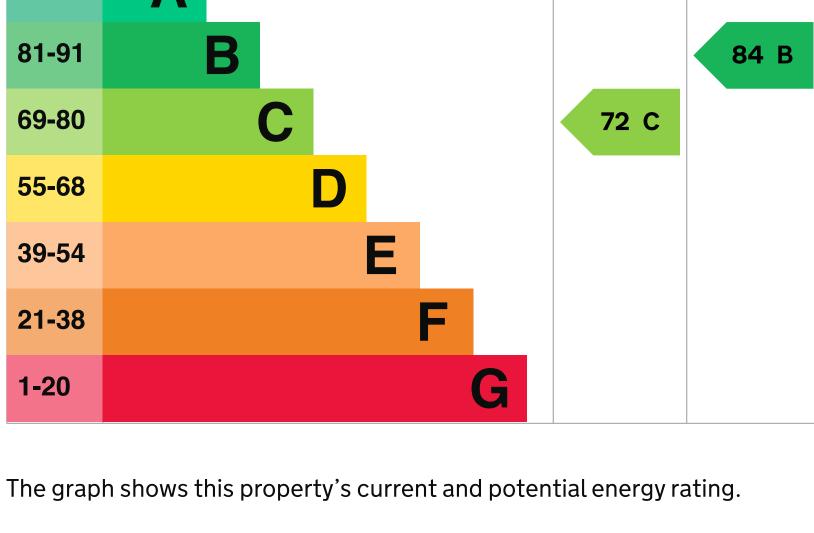

You can read guidance for landlords on the regulations and exemptions.

This property's energy rating is C. It has the potential to be B.

Energy rating and score

See how to improve this property's energy efficiency.

Score **Energy rating** 92+

Current

Potential

Rating

For properties in England and Wales:

Breakdown of property's energy

the rating and score, the lower your energy bills are likely to be.

• the average energy rating is D • the average energy score is 60

Properties get a rating from A (best) to G (worst) and a score. The better

Features in this property

features the assessor could not inspect.

performance

Feature

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition. Assumed ratings are based on the property's age and type. They are used for

Wall Cavity wall, filled cavity Good Pitched, 250 mm loft insulation Roof Good

Description

Roof	Pitched, 100 mm loft insulation	Average		
Window	Fully double glazed	Good		
Main heating	Boiler and radiators, mains gas	Good		
Main heating control	Programmer, room thermostat and TRVs	Good		
Hot water	From main system	Good		
Lighting	Low energy lighting in 79% of fixed outlets	Very good		
Floor	Solid, no insulation (assumed)	N/A		
Secondary heating	None	N/A		
Primary energy use				
The primary energy using square metre (kWh/i	se for this property per year is 178 kilowatt hem2).	ours per		

► About primary energy use

How this affects your energy bills

An average household would need to spend £1,522 per year on heating, hot water and lighting in this property. These costs usually make up the majority

of your energy bills.

improving this property's energy rating. This is **based on average costs in 2024** when this EPC was created. People

You could save £233 per year if you complete the suggested steps for

living at the property may use different amounts of energy for heating, hot water and lighting.

Estimated energy needed in this property is: • 11,025 kWh per year for heating • 2,964 kWh per year for hot water

This property's environmental impact rating is D. It has the potential to be B.
