Cymraeg

Property type	Detached house	
Total floor area	70 square metres	
Rules on letting this property		

You can read guidance for landlords on the regulations and exemptions.

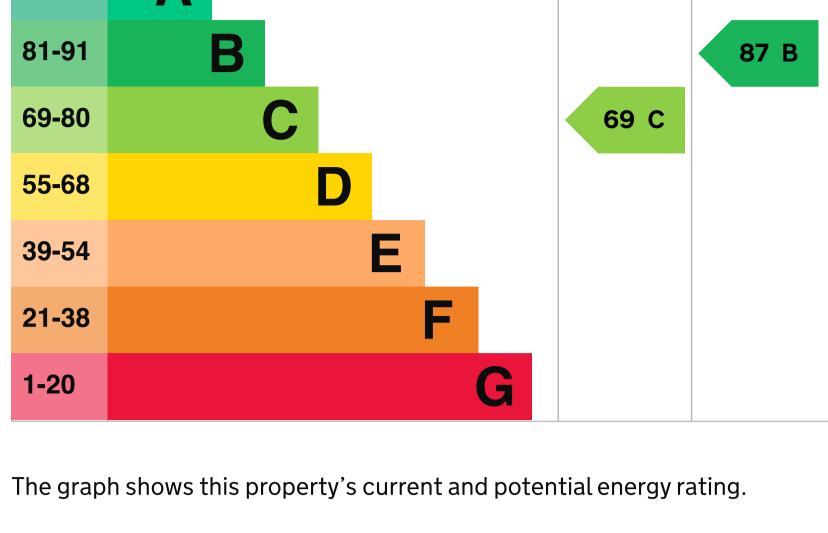

Properties can be let if they have an energy rating from A to E.

Energy rating and score

See how to improve this property's energy efficiency.

This property's energy rating is C. It has the potential to be B.

Energy rating Score 92+

Current

Potential

Good

the rating and score, the lower your energy bills are likely to be.

• the average energy rating is D • the average energy score is 60

Properties get a rating from A (best) to G (worst) and a score. The better

For properties in England and Wales:

Features in this property Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Breakdown of property's energy

Assumed ratings are based on the property's age and type. They are used for

Wall

performance

features the assessor could not inspect. **Feature Description** Rating

Cavity wall, filled cavity

Roof Pitched, 100 mm loft insulation Average

Window	Fully double glazed	Good	
Main heating	Boiler and radiators, mains gas	Good	
Main heating control	Programmer, room thermostat and TRVs Good		
Hot water	From main system, no cylinder thermostat	Average	
Lighting	Low energy lighting in all fixed outlets	Very good	
Floor	Solid, no insulation (assumed)	N/A	
Secondary heating	None	N/A	
Primary energy use			
The primary energy u	se for this property per year is 228 kilowatt h	ours per	

of your energy bills.

square metre (kWh/m2).

About primary energy use

How this affects your energy bills An average household would need to spend £1,117 per year on heating, hot water and lighting in this property. These costs usually make up the majority

You could save £273 per year if you complete the suggested steps for

This is **based on average costs in 2024** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Estimated energy needed in this property is: • 5,842 kWh per year for heating

Carbon emissions
