Energy rating

Potential

Rating

Poor

Good

Average

Current

This property's energy rating is E. It has the potential to be B.

Energy rating and score

B 81-91 82 B 69-80 55-68

39-54 41 E 21-38 1-20 The graph shows this property's current and potential energy rating. Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

• the average energy score is 60

Breakdown of property's energy

Features get a rating from very good to very poor, based on how energy

efficient they are. Ratings are not based on how well features work or their

performance

Features in this property

Wall

Roof

condition. Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Cavity wall, as built, no insulation (assumed)

Cavity wall, as built, insulated (assumed)

Pitched, 100 mm loft insulation

Roof	Pitched, insulated (assumed)	Good	
Window	Fully double glazed	Average	
Main heating	Boiler and radiators, mains gas	Good	
Main heating control	Programmer, no room thermostat	Very poor	
Hot water	From main system	Average	
Lighting	Low energy lighting in 24% of fixed outlets	Poor	
Floor	Solid, no insulation (assumed)	N/A	
Floor	Solid, insulated (assumed)	N/A	
Secondary heating	None	N/A	
Primary energy use The primary energy use for this property per year is 445 kilowatt hours per			
square metre (kWh/n	n2).		
About primary energy use			
Additional information			

• Cavity fill is recommended

How this affects your energy bills

You could **save £900 per year** if you complete the suggested steps for

This is **based on average costs in 2016** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.
