English Cymraeg

Potential

Total floor area 142 square metres

Properties can be let if they have an energy rating from A to E. You can read guidance for landlords on the regulations and exemptions.

Rules on letting this property

This property's energy rating is D. It has the potential to be B.

Energy rating and score

See how to improve this property's energy efficiency.

Score **Energy rating** Current 92+

B 81-91 83 B 69-80 **55-68** 66 D 39-54 21-38 1-20 The graph shows this property's current and potential energy rating. Properties get a rating from A (best) to G (worst) and a score. The better

the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales: • the average energy rating is D

• the average energy score is 60

Features in this property

Breakdown of property's energy

condition.

performance

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect. **Description** Rating **Feature**

Features get a rating from very good to very poor, based on how energy

efficient they are. Ratings are not based on how well features work or their

Wall Sandstone or limestone, as built, no insulation Very (assumed) poor

	(d33diffed)	роог
Wall	Sandstone or limestone, with external insulation	Good
Wall	Cavity wall, as built, partial insulation (assumed)	Average
Roof	Pitched, 150 mm loft insulation	Good
Roof	Roof room(s), insulated	Average
Window	Fully double glazed	Good
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system	Good
Lighting	Low energy lighting in all fixed outlets	Very good
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	None	N/A
Primary energy use		

Additional information

of your energy bills.

About primary energy use

square metre (kWh/m2).

Additional information about this property: • Stone walls present, not insulated

The primary energy use for this property per year is 225 kilowatt hours per

How this affects your energy bills

You could **save £492 per year** if you complete the suggested steps for improving this property's energy rating. This is **based on average costs in 2025** when this EPC was created. People

water and lighting.

living at the property may use different amounts of energy for heating, hot

An average household would need to spend £1,681 per year on heating, hot

water and lighting in this property. These costs usually make up the majority

Estimated energy needed in this property is: • 18,373 kWh per year for heating • 3,523 kWh per year for hot water

Properties get a rating from A (best) to G (worst) on how much carbon

Impact on the environment This property's environmental impact rating is D. It has the potential to be C.

This property produces

This property's potential

production

energy.

dioxide (CO2) they produce each year.

Heating this property

Carbon emissions An average household produces 6 tonnes of CO2

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and

energy use. People living at the property may use different amounts of

5.6 tonnes of CO2

2.8 tonnes of CO2
