energy

certificate

Properties can be let if they have an energy rating from A to E. You can read guidance for landlords on the regulations and exemptions.

Rules on letting this property

Energy rating and score

See how to improve this property's energy efficiency.

B 81-91 69-80 77 C 55-68 62 D 39-54 21-38 1-20 The graph shows this property's current and potential energy rating.

the rating and score, the lower your energy bills are likely to be. For properties in England and Wales:

• the average energy rating is D

Properties get a rating from A (best) to G (worst) and a score. The better

performance

Features in this property Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their

Assumed ratings are based on the property's age and type. They are used for Rating

Pitched, 100 mm loft insulation Roof Average Window Fully double glazed Average Main heating Boiler and radiators, mains gas Good

Electric underfloor heating Main heating Very poor Main heating control Programmer and room thermostat Average Programmer and room thermostat Main heating control Average Hot water From main system Good Good lighting efficiency Lighting Good Solid, no insulation (assumed) N/A Floor N/A Air tightness (not tested) Secondary heating N/A None Primary energy use

About primary energy use

square metre (kWh/m2).

This property had a smart meter for electricity when it was assessed. Smart meters help you understand your energy use and how you could save

The primary energy use for this property per year is 195 kilowatt hours per

How this affects your energy bills

improving this property's energy rating. This is **based on average costs in 2025** when this EPC was created. People living at the property may use different amounts of energy for heating, hot

You could save £193 per year if you complete the suggested steps for

water and lighting. **Heating this property**

• 2,758 kWh per year for hot water

This property's environmental impact rating is C. It has the potential to be C. Properties get a rating from A (best) to G (worst) on how much carbon

2.0 tonnes of CO2 This property's potential production

6 tonnes of CO2

2.7 tonnes of CO2
